## What Does Every Local System have in Common?

All of these systems have one thing in common: the need for quality cataloging records. LaserCat, WLN's four million MARC record bibliographic database on CD-ROM can help you convert and maintain your library's catalog.

The LaserCat database has records in all formats, including books, serials, sound and video recordings and computer files. There are no separate discs you need to purchase. You get high hit rates and quality records in one database. Quarterly updates provide an ongoing source of current cataloging.

LaserCat's powerful and easy-to-use interface makes locating and exporting

records an effortless task. You can modify records for your local system as they are downloaded.

LaserCat for Windows includes a sophisticated MARC record editor for modifying records from the LaserCat database or creating new records.

LaserCat is affordable as a quarterly, school-year or annual subscription. The LaserCat retrieval software is available in Windows, Macintosh and DOS versions.

LaserCat is also available through BCR in Colorado, Iowa, Kansas, Nevada, Utah, and Wyoming.

For a free demo of LaserCat call 1-800 DIAL WLN (1-800-342-5956), 1-360-923-4000 or e-mail us at [lasercat@wln.com](mailto:lasercat@wln.com)

## The Internet

Over the last five years, use of the Internet and, more recently, the World Wide Web has spread from academic libraries to public libraries to school libraries. The editors decided to take a reading among Oregon librarians on how the Internet has affected their professional lives. What are the Internet's good points and bad points? How has it affected our jobs? Many of the articles address these issues from different viewpoints: the sciences, the humanities, general reference, collection development, technical services, school libraries, and the library school student. Two articles present unique approaches to the World Wide Web: Salem Public Library's venture into becoming an Internet provider and Oregon State University's Web site for U.S. government statistics.

Tim Klassen, Guest Editor
